

## SessionWorks Clerk Edition

Designed specifically for the high-volume courtroom, Odyssey<sup>®</sup> SessionWorks Clerk Edition enables you to rapidly access and enter data right in the courtroom—replacing hand-written forms and dramatically increasing efficiency. And of course, this new application from Tyler Courts & Justice is completely integrated with Odyssey Case Manager.

You'll reduce your dependence on paper. Work with multiple defendants, cases or charges simultaneously. Empower your organization with a flexible and time-saving tool that can function even if contact with your main server is lost.

No more pre-printed forms. No problem.

### Powerful

Odyssey SessionWorks Clerk Edition enables you to rapidly default and enter large amounts of data. In Batch mode, you can enter a series of activities with as little as one click for a group of defendants, cases or charges. For example, enter a plea of 'not guilty' to 10 counts at once, regardless of whether each count is for the same defendant. In Side-By-Side mode, you can enter separate actions for each count. For example, rapidly dispose of a case with three different counts with different sentences while viewing them side-by-side.

### Specific

SessionWorks Clerk Edition also empowers you to configure actions specifically for each judge. If a judge has a set of conditions or sentences he or she typically pronounces, set up an action in your SessionWorks Clerk Edition system that applies these activities simultaneously with one simple mouse click.

### Configurable

Your SessionWorks Clerk Edition administrator can add fields to activities

for the purposes of printing that data on forms. For example, add a Trial Date Range field to the appropriate screen for a judge's scheduling order, label it accordingly and update the order form to include it...all within minutes.

### Efficient

Data entry via SessionWorks Clerk Edition is not wasted effort. Once forms are auto-filled and printed in the courtroom, information is uploaded back to Odyssey Case Manager, eliminating the need to re-enter data after the court session is concluded.

### Connected

Odyssey SessionWorks Clerk Edition is designed to work hand-in-hand with its' sister application, Odyssey SessionWorks Judge Edition. Using touch-screen technology, SessionWorks Judge Edition enables judges to have critical case information and documents at their fingertips. Do away with piles of file folders, and electronically present current case files to the judge.

## Odyssey Sets the Standard

Tyler's Odyssey SessionWorks Clerk Edition sets the standard for courtroom information management with unprecedented scalability, integration capabilities and Web-based navigation. That was true when it was originally introduced, and through continued innovation, it's still true today.

Empower your courtroom with Tyler's SessionWorks Clerk Edition.
